

Murder House is a Horror Universe.

By Slenderman

Murder House is the only Haunt using a cinematic universe in which you encounter the same characters each year experiencing their new storylines and environments!

Rather than choosing a different theme each year, **Murder House** expands upon its lore each season with new visceral details! You are invited. It's a Highly Recommended Halloween Experience by Guests Online! When I was Invited, I Only Had One Choice!

That is why I continue returning to the cursed streets of **Thrill Kill**, where the rules of civilization have collapsed beneath Corruption, Madness, and Murder. Here, Criminals, Psychopaths, Monsters, and "Serum Injected Killers" have transformed Tampa into a wasteland where every building has been either obliterated or occupied. LabCorps is ground zero for the Monster Armageddon, as scientists develop an insidious injection serum. Now there are... Many Monsters on the loose and running amok. Each "Killer" obtains a unique "Mutator" that enrages the beast with powers and abilities!

Most haunted attractions ask themselves one simple question each offseason: *"What theme should we build next?"*

Murder House asks a far more hilarious question: *"Are You A Scaredy Cat?"*

That distinction is why this attraction has become something few haunted houses have ever attempted—a true **cinematic horror universe...** Every season expands the Haunts Mythology!

The infamous **Murder House** remains the black heart of the story; the endless violence within the home has torn open a supernatural rift into the Thrill Kill universe! Those who survive are not finished. Beyond that, a portal awaits!

Transported right into: **The Dark Temptation**, a vulgar strip club is ruled by a creature that's always Mr. HYDE! The BOUNCER, whose overwhelming strength makes him one of the most feared savages competing for power, owns this perverted business establishment!

All This and More... Forms a Formidable Brand that releases a Slow Burn of content that leaves everyone... wanting.... More!

Audiences become emotionally invested in recurring characters. Their victories matter and make an impact on the story. This is What's Compelling Fans to return to the familiar antics of the "Murder House" Style. Every visit feels like stepping into the next installment of an ongoing horror saga, instead of just some rehashed theme!

As one who has witnessed civilizations rise and vanish into dust, I find this... refreshing. As the **Scaremaster** of Murder House says, "Fear is the Ultimate Thrill!" & I Couldn't Agree More!

I say, **"Murder House offers something Rare!"**

Adrenaline Inducing Chills for Thrill seekers at a professionally controlled Safe Space for those who enjoy being scared! Now Go! Get a Dose of Horror and Remember that you are Alive!
